For use with the OmniTracs Mobile Computing Platforms 118 (MCP118) and 206 (MCP206)

About Hours of Service

OmniTracs Hours of Service is designed to help drivers comply with Canadian Commercial Vehicle Drivers Hours of Service Regulations.

When you request to see a driver's logs, you can request the driver to hand you this quick reference card and hold the display until for you to see. You can view log data in a graph or detailed view.

Note: Drivers are responsible for verifying the accuracy of the logs. Drivers are also able to add driving time on their electronic logs.

Header Line Information

- At the top, the driver's name is always visible.
- A dot preceding the name indicates the driver's current status:
 - A bright green dot indicates the active driver.
 - A dull green dot indicates the inactive driver.
- To view a team driver's status, tap the drop down list and select a different name.
- The date is the MOT Day. Example: The price calendar date displays if the driver's start time is 6 AM and it is currently 3 AM.
- You can also see the remaining time before the next Hours of Service driving rule violation.
- Regulations change above 60° N, and clocks reflect this change.

Logs Viewed as a Graph

The Graph tab visually depicts the duration of each driver's activity over the past 24 hours.

Tap a bar to see details about that activity.

Today 3:00 Driver: [Name] Start: 00:00 (MOT Day)
Current Targets: OK

Tap the arrow button to see data from other days in the current duty cycle.

A red outline indicates that the duty status occurred during a system or sensor failure. The driver is instructed to keep paper logs during these periods.

The driver's current status, time it started, and how long the driver has been in this status.

Summary and Status Tabs

The Summary tab shows the time remaining before the driver is in violation of each record of Service rule.

Status shows other important driver information.

Today's mileage and hours gained tonight and tomorrow night.
