American Book Publishing Record ,2006 Transnational Imaginations of Socialism Teresa Malice,2022-12-31 Town twinning refers to the postwar phenomenon of administrative exchange between analogous municipalities Cold War related research has mostly interpreted it as an instrument to pursue European integration or to solidify d tente from below However municipalities were not only administrative neutral actors but also bearers of political content This is particularly visible in the case of Italian towns located in the Western bloc guided by socialist oriented administrations and their twin counterparts in the German Democratic Republic This volume explores the connections initiated by such towns in the 1960s 1970s focusing on socialist specific conceptions which fueled the policies implemented by red municipalities in managing local economies and social policies but also in maintaining a lively and interconnected transnational microsociability among grassroots activists Despite the increasing ideological divergences between Eastern and Western communists and between Italian democratic communists and the more dogmatic and repressive strictly pro Soviet ones in the GDR communication continued to flourish on the local level The book explores what still linked the two worlds together the bright side of socialism in this case a common symbolism related to the past practical exchanges in the present dimension and a shared

future imagination and conception of the town on the basis of a socialist horizon built around welfare and services for citizens and workers
