Carlson, Melissa A. Birkett, 2020-06-15 This title is a Pearson Global Edition The Editorial team at Pearson has worked closely with educators around the world to include content which is especially relevant to students outside the United States For courses in Physiological Psychology or Biopsychology A streamlined overview of     **Fundamentals of NeuroIS** René Riedl, Pierre-Majorique Léger, 2015-11-30 This authored volume presents the fundamentals of NeuroIS which is an emerging subfield within the Information Systems discipline that makes use of neuroscience and neurophysiological tools and knowledge to better understand the development use and impact of information and communication technologies This book is an initial guide to this new research domain The target audience primarily comprises PhD students and researchers but the book may also be beneficial for graduate students and practitioners     **The Ecological Brain** Luis H. Favela, 2023-12-22 The Ecological Brain is the first book of its kind using complexity science to integrate the seemingly disparate fields of ecological psychology and neuroscience The book develops a unique framework for unifying investigations and explanations of mind that span brain body and environment the NeuroEcological Nexus Theory NExT Beginning with an introduction to the history of the fields the author provides an assessment of why ecological psychology and neuroscience are commonly viewed as irreconcilable methods for investigating and explaining cognition intelligent behavior and the systems that realize them The book then progresses to its central aim

presenting a unified investigative and explanatory framework offering concepts methods and theories applicable across neural and ecological scales of investigation By combining the core principles of ecological psychology neural population dynamics and synergetics under a unified complexity science approach NExT offers a compressive investigative framework to explain and understand neural bodily and environmental contributions to perception action and other forms of intelligent behavior and thought The book progresses the conversation around the role of brains in ecological psychology as well as bodies and environments in neuroscience It is essential reading for all students of ecological psychology perception cognitive sciences and neuroscience as well as anyone interested in the history and philosophy of the brain mind sciences and their state of the art methods and theories

*The Sentient Archive* Bill Bissell, Linda Caruso Haviland, 2018-06-26 The Sentient Archive gathers the work of scholars and practitioners in dance performance science and the visual arts Its twenty eight rich and challenging essays cross boundaries within and between disciplines and illustrate how the body serves as a repository for knowledge Contributors include Nancy Goldner Marcia B Siegel Jenn Joy Alain Platel Catherine J Stevens Meg Stuart Andr Lepecki Ralph Lemon and other notable scholars and artists Hardcover is un jacketed

*Unraveling* Matthew J. Wolf-Meyer, 2020-10-20 Developing a cybernetic model of subjectivity and personhood that honors disability experiences to reconceptualize the category of the human Twentieth century neuroscience fixed the brain as the basis of consciousness the self identity individuality even life itself obscuring the fundamental relationships between bodies and the worlds that they inhabit In *Unraveling* Matthew J Wolf Meyer draws on narratives of family and individual experiences with neurological disorders paired with texts by neuroscientists and psychiatrists to decenter the brain and expose the ableist biases in the dominant thinking about personhood *Unraveling* articulates a novel cybernetic theory of subjectivity in which the nervous system is connected to the world it inhabits rather than being walled off inside the body moving beyond neuroscientific symbolic and materialist approaches to the self to focus instead on such concepts as animation modularity and facilitation It does so through close readings of memoirs by individuals who lost their hearing or developed trauma induced aphasia as well as family members of people diagnosed as autistic texts that rethink modes of subjectivity through experiences with communication caregiving and the demands of everyday life Arguing for a radical antinormative bioethics *Unraveling* shifts the discourse on neurological disorders from such value laden concepts as quality of life to develop an inclusive model of personhood that honors disability experiences and reconceptualizes the category of the human in all of its social technological and environmental contexts
