*Good Will Hunting: Do Disasters Make Us More Charitable?* Mr. Serhan Cevik, 2023-02-03 Humans are usually compassionate caring and empathetic toward others but are we really hardwired for altruism when a disaster hits There is evidence that people exposed to natural disasters tend to behave more philanthropically but most studies rely on small scale surveys and experimental data For that reason this paper contributes to the literature by investigating whether the COVID 19 pandemic has altered prosocial tendencies and charitable donations using a novel daily dataset of debit and credit card transactions I conduct a real time analysis of actual charitable donations in three European countries and find that the COVID 19 pandemic and government interventions have no significant effect on how much people contribute to charities as a share of total spending A higher preference for precautionary savings in the midst of the pandemic appears to outweigh altruistic behavior while government welfare programs crowds out private charitable donations **PSYCHOLOGY OF**
