**Laszlo Moholy-Nagy** Joyce Tsai, 2018-04-06 Laszlo Moholy-Nagy is the first monograph on Moholy to attend to the fraught but central role painting played in shaping his aesthetic project His reputation has been that of an artist far more interested in exploring the possibilities offered by

photography film and other new media than in working with what he once called the anachronistic medium of painting And yet with the exception of the period between 1928 and 1930 Moholy painted throughout his career Joyce Tsai argues that his investment in painting especially after 1930 emerged not only out of pragmatic and aesthetic considerations but also out of a growing recognition of the economic political and ethical compromises required by his large scale technologically mediated projects aimed at reforming human vision Without abandoning his commitment to fostering what he called New Vision Moholy came to understand painting as a particularly plastic field in which the progressive possibilities of photography film and other emergent media could find provisional expression Provided by publisher Computer Graphics Mr. Rohit Manglik,2024-07-11 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels
