C. Penner,2012 There is an essentially tinker toy model of a trivial bundle over the classical Teichmüller space of a punctured surface called the decorated Teichmüller space where the fiber over a point is the space of all tuples of horocycles one about each puncture This model leads to an extension of the classical mapping class groups called the Ptolemy groupoids and to certain matrix models solving related enumerative problems each of which has proved useful both in mathematics and in theoretical physics These spaces enjoy several related parametrizations leading to a rich and intricate algebro geometric structure tied to the already elaborate combinatorial structure of the tinker toy model Indeed the natural coordinates give the prototypical examples not only of cluster algebras but also of tropicalization This interplay of combinatorics and coordinates admits further manifestations for example in a Lie theory for homeomorphisms of the circle in the geometry underlying the Gauss product in profinite and pronilpotent geometry in the combinatorics underlying conformal and topological quantum field theories and in the geometry and combinatorics of macromolecules This volume gives the story a wider context of these decorated Teichmüller spaces as

developed by the author over the last two decades in a series of papers some of them in collaboration Sometimes correcting errors or typos sometimes simplifying proofs and sometimes articulating more general formulations than the original research papers this volume is self contained and requires little formal background Based on a master s course at Aarhus University it gives the first treatment of these works in monographic form *Cultures and Globalization* Helmut K Anheier, Yudhishtir Raj Isar, 2012-03-31 Today is a new metropolitan age and for the first time ever more people live in cities than they do anywhere else As cities strengthen their international and cultural influence the global world is acted out most articulately in the world s urban hubs through its diverse cultures broad networks and innovative styles of governance Looking at the city through its internal dynamics the book examines how governance and cultural policy play out in a national and international framework Making a truly global contribution to the literature the editors bring together a truly international and highly respected bevy of scholars In doing so they skilfully steer debates beyond the city as an economic powerhouse to cover issues that fully comprehend a city s cultural dynamics and its impact on policy including alternative economies creativity migration diversity sustainability education and urban planning Innovative in its approach and content this book is ideal for students scholars and researchers interested in sociology urban studies cultural studies and public policy **11 Practice Tests for the SAT and PSAT, 2013 Edition** Princeton Review, 2012-07-03 If you need to know it it s in this book 11 Practice Tests for the SAT PSAT 2013 Edition includes 11 total full length practice tests 10 for the SAT and 1 for the PSAT Overview of SAT basics scoring and content Helpful information about the SAT including the Writing section Answers and detailed explanations to help you learn from your mistakes
