Nance,1989-09-01 There are certain mistakes that students frequently make while learning algebra This packet focusing on graphing clearly explains these mistakes so students can avoid them Examples then illustrate the correct way of working an algebra problem and practice problems are provided Puzzles and games based on scientific formulas and interesting facts challenge students to think creatively Self checking exercises motivate students to finish each page while acquiring valuable algebraic skills

Linear Equations Tony G. Williams,2011-09-01 This packet challenges students minds with fun puzzles that develop logic reasoning skills concentration and confidence Focusing on linear equations each Sudoku puzzle is like a mini lesson with background discussion strategy and demonstration for solving each problem After completing the algebra exercises students are given enough data that will allow them to reason their way through the remaining cells of the Sudoku puzzle that follows Each activity is presented on a ready to use reproducible master that can be easily photocopied or reproduced as a transparency for full class instruction and discussion

Graphing Linear Equations, Part 2 , A more versatile approach to writing the equation of a line is the point slope form in which only two points are required and neither needs to intercept the y axis Work through several examples and become comfortable determining the equation using the line and the line using the equation
