

Interpreting Graphs Worksheet Answer Key

1. Given the graph below, answer the following questions:

- a. What is the independent variable for this graph?

The independent variable is the number of chapters.

- b. What is the dependent variable for this graph?

The dependent variable is the numbers of typos found.

- c. What can you assume about the relationship between number of chapters in a book and the amount of typos found?

Based on the graph's trend, I can assume that as the number of chapters in a book increases, the number of typos found in the book also increases.

- d. About how many typos would you assume to be in a book with 10 chapters?

Based on the graph, I would estimate about 13 typos in a book with 10 chapters.

2. Given the graph below, answer the following questions:

- a. What is the independent variable for this graph?

The independent variable is height.

- b. What is the dependent variable for this graph?

The dependent variable is weight.

- c. Write a two-sentence explanation for what the graph is attempting to describe.

The graph describes the relationship between a person's height and a person's weight. The graph's trend shows that taller people tend to be heavier, while shorter people tend to weigh less.

- d. Assume that the increments for weight are 20 pounds, starting with 50 pounds, and the height increment is by 5 inches, starting with 50 inches. What would you expect a person to weigh if s/he was 80 inches tall?

Based on the graph, I would assume that a person that is 80 inches tall would weigh about 220-230 pounds.

- e. Draw a line on the graph that you believe represents the best fit for weight and height.
