

History of modern psychology

5 pages | 1030 words

Psychology's history cannot be understood adequately without knowing something of philosophy's history. All of the important issues that concern modern psychologists have been addressed by philosophers (2008). I will discuss how the philosophers: Descartes, Locke, Hume, Mill, and Berkley. These individuals life work greatly influenced the development of modern psychology. The End of the Renaissance and the 17th century brought to history, the man who is "sometimes considered the father of modern philosophy, mathematics, physiology and psychology", the great philosopher, Rene' Descartes (Goodwin, 2008).

Descartes was born in La Haye on March 31, 1596 of Joachim Descartes and Jeanne Brochard. He was one of a number of surviving children (two siblings and two half-siblings). His father was a lawyer and magistrate, which apparently left little time for family. Descartes' mother died in May of the year following his birth, and he, his full brother and sister, Pierre and Jeanne, were left to be raised by their grandmother in La Haye. At around ten years of age, in 1606, he was sent to the Jesuit college of La Fleche.

He studied there until 1614, and in 1615 entered the University of Poitiers, where a year later he received his Baccalaureate and License in Canon & Civil Law (2012). Goodwin (2008) summarized that, Descartes was a rationalist, believing that the way to true knowledge was through the systematic use of his reasoning abilities. Because he believed that some truths Were universal and could be arrived at through reason and without the necessity of sensory experience, he was also a nativist. In addition, he was a dualist and an interactionist, believing that mind and body were distinct essences, but that they had direct influence on each other.

It is Descartes' who is most likely responsible for many of the themes that came from the late Renaissance that are incorporated into the science of psychology today, but since that time there are many philosophers in the Western tradition that contributed to the formation of psychology as a discipline. Western Philosophers that Contributed to the Formation of Psychology as a Discipline John Locke (b. 1632, d. 1704) was a British philosopher, Oxford academic and medical researcher. Locke is often classified as the first of the great English empiricists.

Locke, according to Goodwin (2008) "is important to psychology as a consequence of the concepts expressed in two of his books, An Essay Concerning Human Understanding (1690/1963) and Some Thoughts Concerning Education (1693/1963) (p. 38). Goodwin (2008) explains further that the "former explains Locke's views on how knowledge is acquired, how we as humans come to understand our world" (p. 38) and the "latter is based on a series of letters to a friend and shows how empiricist thinking could be applied to all aspects of a child's education" (p. 38).

David Hume was born near Edinburgh, Scotland. David Hume, was an empiricist/associationist that Goodwin (2008) summarizes was "known for making a distinction between impressions, which result from sensation, and ideas, which he said were faint copies of impressions" (p. 59). It is also said...
