# Observing Human Traits Lab

Background: Physical traits are observable characteristics that are determined by genes. Genes are specific segments of DNA located on chromosomes that code for a particular trait. Most genes have two or more variations called atteles. Some alieles are dominant over and dominant atletes will be expressed (an organism's phenotype or physical appropriate over recessive alletes. Roccessive alletes may be present in an organism but expressive masked in the presence of a dominant allete for the same gene. Roccessive trait:

Keep in mind that it's not always quite this simple. There are other factorization, and most traits have several genes that influence in introduction to dominant and recessive traits. Let's our risks
