Winner AEDEAN Leocadio Mart n Mingorance Book Award for Theoretical and Applied English Linguistics 2020 This book investigates the syntactic phenomenon of ellipsis and the linguistic forces that trigger it It presents the results of a corpus based study which takes into account grammatical semantic discursive usage related and processing variables Evelyn Gand n Chapela builds upon the few empirical works on ellipsis in Present day English to offer the first comparative analysis of ellipsis and its development throughout the recent history of the English language Moreover the book also provides a complex query algorithm which automatically detects and retrieves cases of ellipsis leading to successful recall ratios applicable to a wide range of parsed corpora **The Latin Dialect of the Ager Faliscus** Gabriël C. L. M. Bakkum,2009

Annotation Although the Ager Faliscus lay between the areas where Etruscan Latin and Sabellic languages were spoken the inscriptions from the area from before c 150 bce show that it used a speech of its own known as Faliscan Most scholars agree that Faliscan is linguistically very close to Latin but the hypothesis that it is in fact a Latin dialect has not been the subject of a major publication until now In this work the linguistic data on Faliscan provided by the inscriptions are analyzed and compared to the languages of the surrounding areas Sociolinguistic aspects such as language contact and local identity are discussed as well The main conclusion is that Faliscan can indeed be regarded as a dialect of Latin The work includes a re edition of all inscriptions in many cases based on autopsy This title can be previewed in Google Books <http://books.google.com/books/vid/ISBN9789056295622> **Principles of Cognition, Language and Action** N. Praetorius,2012-12-06 This book

addresses a growing concern as to why Psychology now more than a hundred years after becoming an independent research area does not yet meet the basic requirements of a scientific discipline on a par with other sciences such as physics and biology These requirements include agree ment on definition and delimitation of the range of features and properties of the phenomena or subject matter to be investigated secondly the development of concepts and methods which unambiguously specify the phenomena and systematic investigation of their features and properties A third equally important requirement implicit in the first two is exclusion from enquiry of all other mattes with which the discipline is not concerned To these requirements must then be added the development of basic assumptions about the nature of what is under investigation and of principles to account for its properties and to serve as a guide as to what are relevant questions to ask and theories to

develop about them **Textbook of Israeli Hebrew** Haiim B.
