emerging topic of Distributed User Interfaces (DUIs). DUIs are concerned with the repartition of one of many elements from one or many user interfaces in order to support one or many users to carry out one or many tasks on one or many domains in one or many contexts of use, each context of use consisting of users, platforms and environments. The 20 chapters in the book cover between them the state of the art, the foundations and original applications of DUIs. Case studies are also included and the book culminates with a review of interesting and novel applications that implement DUIs in different scenarios.
