TRON Project 1989 Ken Sakamura, 2012-12-06 It is almost six years since the inauguration of the TRON project a concept first proposed by Dr K Sakamura of the University of Tokyo and it is almost 2 years since the foundation of the TRON Association on March 1988 The number of regular member companies registered in the TRON Association as of November 1988 is 145 which is a new record for the Association Some of this year's major activities that I would particularly like to mention are Over 50 TRON project related products have been or are about to be introduced to the marketplace according to a preliminary report from the Future Study Committee of the TRON Association In particular I am happy to say that the ITRON subproject which is ahead of the other subprojects has progressed so far that several papers on ITRON applications will be presented at this conference which means that the ITRON specifications are now ready for application to embedded commercial and industrial products

TRON Project 1990 Ken Sakamura, 2012-12-06 I wish to extend my warm greetings to you all on behalf of the TRON Association on this occasion of the Seventh International TRON Project Symposium The TRON Project was proposed by Dr Ken Sakamura of the University of Tokyo with the aim of designing a new comprehensive computer architecture that is open to worldwide use Already more than six years have passed since the project was put in motion The TRON Association is now made up of over 140 companies and organizations including 25 overseas firms or their affiliates A basic goal of TRON Project activities is to offer the world a human oriented computer culture that will lead to a richer and more fulfilling life for people throughout the world It is our desire to bring to reality a new order in the world of computers based on design concepts that consider the needs of human beings first of all and to enable people to enjoy the full benefits of these computers in their daily life Thanks to the efforts of Association members in recent months a number of TRON specification 32 bit microprocessors have been made available ITRON specification products are continuing to appear and we are now seeing commercial implementations of BTRON specifications as well The CTRON subproject meanwhile is promoting standardization through validation testing and a portability experiment and products are being marketed by several firms This is truly a year in which the TRON Project has reached the practical implementation stage

algorithms Shows how an open source protocol stack can be integrated in an embedded system and interfaced with other software components Analyzes the main components of the FreeRTOS Application Programming Interface API detailing the implementation of key operating system concepts Discusses advanced topics such as formal verification model checking runtime checks memory corruption security and dependability Embedded Software Development The Open Source Approach capitalizes on the authors extensive research on real time operating systems and communications used in embedded applications often carried out in strict cooperation with industry Thus the book serves as a springboard for further research

**TRON Project 1987 Open-Architecture Computer Systems** Ken Sakamura,2012-12-06 Almost 4 years have elapsed since Dr Ken Sakamura of The University of Tokyo first proposed the TRON the realtime operating system nucleus concept and 18 months since the foundation of the TRON Association on 16 June 1986 Members of the Association from Japan and overseas currently exceed 80 corporations The TRON concept as advocated by Dr Ken Sakamura is concerned with the problem of interaction between man and the computer the man machine inter face which had not previously been given a great deal of attention Dr Sakamura has gone back to basics to create a new and complete cultural environment relative to computers and envisage a role for computers which will truly benefit mankind This concept has indeed caused a stir in the computer field The scope of the research work involved was initially regarded as being so extensive and diverse that the completion of activities was scheduled for the 1990s However I am happy to note that the enthusiasm expressed by individuals and organizations both within and outside Japan has permitted acceleration of the research and development activities It is to be hoped that the presentations of the Third TRON Project Symposium will further the progress toward the creation of a computer environment that will be compatible with the aspirations of mankind **Official Gazette of the**
