Jaguar Mk1 and 2, S-Type and 420 James Taylor, 2016-02-29 A history of all four generations of compact Jaguar and their Daimler equivalents tracing the gradual development of Sir William Lyons' original idea over a period between 1955 and 1969. From the powerful luxury MK 1 and 2 cars to the 4.2 litre 420, this book covers design, development and styling, special bodied variants, racing performance, buying and owning a compact Jaguar saloon model and finally specifications and production figures.

Jaguar/Daimler XJ40 Peter Crespin, 2008 A practical and highly illustrated hands-on guide taking you step by step through examination and purchase of Jaguar's highly developed flagship saloon which took the company from the Leyland years into private ownership once more. Covering all engine and trim versions, here's what to look for, what to avoid and whether the car is likely to suit your needs, plus relative values and the best places to buy. Also includes full details on backup organisations.

The Autocar, 1987 *Autocar*, 2005 Normalization and Prediction of Geotechnical Properties Using the Cone Penetrometer Test (CPT) Richard Scott Olsen, 1994 This research was to develop techniques for 1 stress normalization of CPT measurements and geotechnical properties and 2 CPT prediction of geotechnical properties using cone and sleeve friction resistance values. Stress normalization allows a variable geotechnical property to be reduced to an equivalent value at a standard confining stress. A new concept, the Stress Focus, was identified which provides a basis for understanding soil strength as a function of confining stress. This study demonstrated that sand friction angles for different initial relative densities converge to a Stress Focus at high confining stress, approximately 100 atm, where the strength behavior is similar to that of a sedimentary rock. Dilation of dense sands decreases with increased confining stress until the Stress Focus is reached, as confirmed using historic high pressure triaxial test data as well as CPT measurements from laboratory chamber tests and uniform soil layers. The paths of convergence to the Stress Focus are exponentially related to confining stress and are the basis for development of CPT cone and sleeve friction resistance normalization techniques. The overburden stress at the Stress Focus is soil type dependent. The stress exponent for SPT normalization was shown to be equal to the CPT derived stress exponent. CPT correlations to geotechnical properties were established using both CPT cone resistance and friction ratio. Geotechnical properties: Stress exponent, Sand friction angles, Stress normalization, Soil strength.

GT Sam Dawson, 2006 Since the arrival of the Lancia Aurelia B20 Grand Tourer GT in 1953, GTs have been the ultimate in luxury performance cars. This book, the first in a series of three, tells the stories behind some of the most glamorous and alluring vehicles of the fifties, sixties and seventies: the Grand Tourers. Since the arrival of the Lancia Aurelia B20 GT in 1953, manufacturers have competed with both popular culture and each other to find that perfect balance of l
