

3-798 (Rev. 1-1987) 1-1000000000000000

## INSTALLING and OPERATING your avionics

Attached is a series of documents relating to the avionics enclosed. The wiring harness has been wired to a standard configuration unless we have been instructed otherwise. To install your avionics, find the page describing the size of the cutout in the instrument panel and mount the tray. The wires are all identified with a colored band indicating where they should be connected.

Red band	Avionics bus (+14 volts).
Black band	Aircraft ground.
Blue band	Interior light intensity control.
Yellow band	PTT (pilot push to talk switch).
Yellow&Yellow band	PTT (passenger push to talk switch).
Black & Yellow band	Transmit audio from intercom or mike.
Black & Blue band	Received audio to intercom or headset.

If you ordered a transponder but did not order an altitude encoder for mode C operation, the wires on the transponder for mode C will be bundled near the connector for connection to your altitude encoder. The schematic attached on the Van's Aircraft title block clearly defines the connections to your aircraft system.

Also attached are more detailed connections from your avionics supplier. The last section will be the OPERATION instructions for your avionics. If you have questions, feel free to call and ask for specifics.
