

PRINCIPLES OF MACROECONOMICS
QUIZ #1 – COVERING CHAPTERS 1-4

INSTRUCTIONS: Please show your work / explain your answers or you will lose credit. Please PDF the quiz answers by midnight and drop into eLearning assignment box.

1. What is the economic problem? Why does scarcity affect everyone?

The economic problem is scarcity. Because resources are scarce everyone is impacted by scarcity. As a result, we must pick a new course of action or give up something to obtain something (opportunity cost). The three economic problems of "What gets produced?" "How is it produced?," and "Who gets it?" arise because of the scarcity of resources.

2. Because of the quantity and quality of its resources, the U.S. has an absolute advantage in the production of many goods and services. Does this imply that the U.S. cannot benefit from trading with a developing country that has less productive ability? Why or why not?

No, because free trade and specialization will benefit all trading partners, even if they are "absolutely" more efficient producers, by the notion of comparative advantage. This is because when two parties trade and have a comparative advantage in the manufacture of a good (specialization), the producing party can do so at a reduced opportunity cost, making the product more advantageous and effective for the United States.

3. The following table shows output per hour for Martha and Stewart who make gift baskets and potholders:

	Output per Hour	
	Martha	Stewart
Gift Baskets	10	16
Potholders	26	24

What is the opportunity cost of a potholder for Martha? What is the opportunity cost of a potholder for Stewart? Who has a comparative advantage in producing potholders? Who has a comparative advantage in producing gift baskets?

For every potholder, Martha loses 0.38 gift baskets
For every potholder, Stewart loses 0.67 gift baskets

For every gift basket, Martha loses 2.6 potholders
For every gift basket, Stewart loses 1.5 potholders

Comparative advantage: gift baskets – Stewart
Potholder – Martha
