Imagined Causes: Hume's Conception of Objects Stefanie Rocknak, 2012-09-14 This book provides the first comprehensive account of Hume's conception of objects in Book I of A Treatise of Human Nature What according to Hume are objects Ideas Impressions Mind independent objects All three None of the above Through a close textual analysis Rocknak shows that Hume thought that objects are imagined ideas But she argues he struggled with two accounts of how and when we imagine such ideas On the one hand Hume believed that we always and universally imagine that objects are the causes of our perceptions On the other hand he thought that we only imagine such causes when we reach a philosophical level of thought This tension manifests itself in Hume's account of personal identity a tension that Rocknak argues Hume acknowledges in the Appendix to the Treatise As a result of Rocknak's detailed account of Hume's conception of objects we are forced to accommodate new interpretations of at least Hume's notions of belief personal identity justification and causality

Recollections of a Jewish Mathematician in Germany Abraham A. Fraenkel,2016-10-21 Abraham A Fraenkel was a world renowned mathematician in pre Second World War Germany whose work on set theory was fundamental to the development of modern mathematics A friend of Albert Einstein he knew many of

the era's acclaimed mathematicians personally. He moved to Israel then Palestine under the British Mandate in the early 1930s. In his autobiography Fraenkel describes his early years growing up as an Orthodox Jew in Germany and his development as a mathematician at the beginning of the twentieth century. This memoir, originally written in German in the 1960s, has now been translated into English with an additional chapter covering the period from 1933 until his death in 1965, written by the editor Jiska Cohen Mansfield. Fraenkel describes the world of mathematics in Germany in the first half of the twentieth century: its origins and development, the systems influencing it, and its demise. He also paints a unique picture of the complex struggles within the world of Orthodox Jewry in Germany. In his personal life, Fraenkel merged these two worlds during periods of turmoil, including the two world wars and the establishment of the state of Israel. Including a new foreword by Menachem Magidor. Foreword to the 1967 German edition by Yehoshua Bar Hillel. **The Philosophical Review** Jacob Gould Schurman, James Edwin Creighton, Frank Thilly, Gustavus Watts Cunningham, 1909.
