

Foxboro® Model 84 Series

MNPT Vortex Meter

Model 84 Series Description

The Foxboro® Model 84 Series Intelligent Vortex flowmeters are the highest performing vortex flowmeters on the market. These instruments are designed for flexibility and reliability in harsh process environments. No other vortex flowmeter measures up to the Model 84 for accuracy in liquid, gas, and steam. The Model 84 is now available in a MNPT (Male National Pipe Thread), and is well suited for direct replacement of turbine and magnetic flowmeters. The Model 84 incorporates patented DirectSense technology and Flexible Tuning for unmatched performance. DirectSense technology eliminates unreliable, mechanical sensor linkages used in other vortex meters. The result is a simpler, more reliable design that is more sensitive to flow and less sensitive to noise. Combined with Flexible Tuning, the Model 84 has the widest flow range capability of any vortex meter. The Model 84 is also equipped with an on-board LCD Indicator/Configurator.

Summary

The Foxboro Model 84 flowmeters are the highest performing vortex flowmeters on the market. The new Foxboro threaded vortex flowmeter is well suited for direct replacement of turbine, magnetic flow and orifice meters.

Business Value

The Foxboro Model 84 Series MNPT (Male National Pipe Thread) Vortex flowmeter has high accuracy with reduced maintenance costs and direct replacement of existing flowmeters. No need to modify peripheral equipment.
