In addition to the five main windows, SketchUp also includes several other windows, such as the Component window that's open in Figure 1-1. You can open and close these as needed by using the Window menu. With the tools in these windows, you'll apply color and shading to your models, select prefabricated components, add shadows and lighting effects, and export your project.

Don't Be Afraid to Play

When you get started, don't be too afraid to play. The SketchUp software is designed to be a fun and easy-to-use tool for creating 3D models. It's not a professional-grade tool, but it's a great way to learn about 3D modeling and to create some fun and interesting models. Don't be afraid to experiment and to make mistakes. That's how you learn.

SketchUp's menu bar is located at the top of the window, and it includes the File, Edit, Window, and Help menus. The File menu is the most important, and it includes options for opening, saving, and exporting your models. The Edit menu is used for modifying your models, and the Window menu is used for managing the various windows. The Help menu provides access to the SketchUp documentation.
