every notion or idea together with its opposite or negation and with their spectrum of neutralities in between them i.e. notions or ideas supporting neither nor. The and ideas together are referred to as Neutrosophy is a generalization of Hegel's dialectics the last one is based on and only. According to this theory every idea tends to be neutralized and balanced by and ideas as a state of equilibrium. In a classical way are disjoint two by two. But since in many cases the borders between notions are vague imprecise Sorites it is possible that and of course have common parts two by two or even all three of them as well. Neutrosophic Set and Neutrosophic Logic are generalizations of the fuzzy set and respectively fuzzy logic especially of intuitionistic fuzzy set and respectively intuitionistic fuzzy logic. In neutrosophic logic a proposition has a degree of truth  $T$  a degree of indeterminacy  $I$  and a degree of falsity  $F$  where  $T, I, F$  are standard or non standard subsets of  $[0, 1]$ . Neutrosophic Probability is a generalization of the classical probability and imprecise probability. Neutrosophic Statistics is a generalization of the classical statistics. What distinguishes the neutrosophics from other fields is the which means neither nor which of course depends on can be indeterminacy neutrality tie game unknown contradiction ignorance imprecision etc.
