- after questioning the user
- before establishing a theory of probable cause
- **after testing a theory to determine the cause***
- after implementing preventive measures

Explanation: The steps of the troubleshooting process are as follows:
Identify the problem.

Establish a theory of probable cause.

Test the theory to determine the cause.

Establish a plan of action to resolve the problem and implement the solution.

Verify full system functionality and, if applicable, implement preventive measures.

Document findings, actions, and outcomes.

It is during step 4 that if no solution is achieved in the previous step that a technicians needs further research.
