

ITRON MODULAR SMART METER

EM420i

A smart meter that paves the way for the smart grid

There is a lot of hype in the market today around the smart grid and the way it affects utilities. With extensive experience in smart meter deployment and long-standing collaboration with utilities, Itron introduces a new generation modular smart meter that will help utilities invest with confidence in smart metering infrastructure – the enabling technology for the smart grid.

A TRULY INTEROPERABLE, MODULAR AND SECURE SMART METER

Moving towards the smart grid obviously imposes major capital and operational investments for utilities. In a constant changing market, the speed of technological advances is a crucial challenge for utilities, given the scale of the investment needed. Utilities should ensure that both sustainable and profitable investments are in place to make their infrastructure fit with the future.

This means being able to forecast future technology developments, as well as investing in the required infrastructure capable of coping with technologies which are continuously evolving.

Understanding the end result of what the utility requires is essential to provide an effective and efficient smart metering solution. Itron uses a partnership approach to understand and analyze in detail the real market use cases of each individual utility and to provide a customized solution for them.

KEY BENEFITS

- Future-proof platform adapted for smart grid evolution
- Smart Payment ready
- Advanced applications matching deregulated market requirements
- Improved operational efficiency
- End-consumer driven
