**Diccionario Ingles Técnico Aeronáutico** Facundo Conforti,Augusto DeSantis, La industria aeroespacial es la segunda actividad mas normada luego de las actividades nucleares esta regida por infinidad de normas reglamentaciones directivas documentacion especi fica y todo tipo de manuales de referencia obligatoria La gran mayoria llega a manos de usuarios operadores talleristas etc en idioma ingles el idioma de uso aerona utico por naturaleza A ello se suma el hecho de que la industria aerona utica no esta aislada de las actividades humanas sino que interactua se nutre y hace su aporte a ellas creando la necesidad de un sillon interdisciplinario Ahora bien si bien conocemos la existencia de esta necesidad de creacion de un fuerte vinculo interdisciplinario tambien sabemos que en esta tarea nos encontramos con una gran barrera en el mismo la comunicacion A partir de esto es posible considerar varios impedimentos en esa barrera Uno de los mas importantes es el idioma como factor concurrente esta el uso de regionalismos y como consecuencia de ellos la aplicacion de jergas especifcias Desde los albores de la aviacion hemos convivido con ese problema sucede que al incrementarse dia a dia el numero de operaciones al crecer el parque aeronautico y convertirse la aviacion en una necesidad para el resto de las actividades humanas las condiciones inseguras los incidentes y los accidentes continuan produciendose quedando de manifiesto las falencias de la industria en ese aspecto Las nuevas tecnologias en materiales los nuevos metodos de diseño y los planes de mantenimiento tecnicas de inspeccion no destructivas han reducido los riesgos latentes de fallas tecnicas pero no todos los aspectos relacionados con la vida humana puede solucionarlos la tecnologia por lo que en paralelo con los desarrollos tecnologicos se han creado conceptos de gestion del factor humano que han contribuido en gran medida a la seguridad operacional y desde el año 1978 su estudio y prevencion se ha expandido considerablemente por lo que en todos los programas de estudio y mejoramiento de la interaccion antropologica CRM MRM LOFT SHELL etc la comunicacion es un vinculo importante si no en la seguridad operacional Si trasladamos lo expuesto a las tareas diarias ya sea en la operacion de una aeronave en el mantenimiento de la misma en el control del tránsito aereo en la administracion de las empresas operadoras o en cualquier otra actividad relacionada con la industria aeroespacial se presentara el problema del uso del idioma inglés los regionalismos y las jergas especifcias factores tendientes a desencadenar una sucesion de eventos inseguros que podrian desembocar en un incidente o en un accidente de consecuencias catastroficas Cuando se analiza la comunicacion oral y escrita es importante tener en cuenta que si bien manejamos un vocabulario tecnico comun es inevitable tanto en ingles como en espanol el uso de

regionalismos y argot jargon en ingle s Por ejemplo un tecnico ecuatoriano hablara de la bita cora de la aeronave mien tras que uno argentino hablara de la libreta historial de la aeronave Esta diver gencia puede justificarse como un caso de regionalismos de pais diferentes aho ra bien en el segundo ejemplo el mismo tecnico argentino en la provincia de Bue nos Aires hablara de chavetas para frenar un bulo n mientras que otro tecnico argentino en Cor doba hablara de cupillas para frenar un bulo n En paralelo se puede ver tambie n que los diferentes fabricantes tienen lexicos especi ficos con respectivo a sus productos por ejemplo uno de los mas conocidos fabricantes britanicos no posee un sistema propio de codigos de denominacion y aplicacion de Boletines de Servicio no mandatorios muy distinto al que manejan sus competidores directos de Estados Unidos y Canada Por eso la intencion de este manual es contemplar una cantidad importante de tales divergencias presentandolas en cada asiento especifico para que el uso del termino y el concepto se apliquen con la mayor propiedad posible La propuesta de este manual es constituirse en una obra de referencia pensada como apoyo idiomatico para interpretar y utilizar con mayor exactitud todos los niveles en que se presenta la terminologia aeronautica y contribuir a la aclaracion de las dudas que continuamente se dan en la traduccion de ambas lenguas en los diferentes campos de la aviacion
