Energy-Efficient Timber-Glass Houses

Vesna Žegarac Leskovar, Miroslav Premrov, 2013-09-30 The book discusses combining timber and glass two eco materials with a view to developing an optimal contemporary energy efficient house with an attractive design Furthermore the book connects an architectural design approach with structural research to show the possibilities of stabilizing the building with an increased size of the glazing Research results where the glazing is considered as a load bearing structural element are therefore presented in a manner leading to the development of an optimal model of the timber glass house considering both the structural and energy related aspects The presented research work can be useful to designers and future experts in their planning of optimal energy efficient timber buildings The study is based on using timber and glass which were previously neglected as construction materials With suitable technological development and appropriate use they are nowadays becoming essential construction materials as far as energy efficiency is concerned However their combined use is extremely complicated from both the constructional point of view as well as from that of energy efficiency and sets multiple traps for designers A good knowledge of their advantages and drawbacks is thus vitally important which is shown in the present monograph Energy efficient timber glass houses was selected by the Slovenian National Research Agency as an extraordinary scientific achievement in the field of technical sciences civil engineering for the year 2013

Biopsychosocial Model Hongbao Cao, Shaolei Teng, Sha Liu, 2025-08-18 ADHD Attention Deficit Hyperactivity Disorder and anxiety disorders are two of the most common psychiatric conditions often co existing in the same individuals The relationship between these disorders is complex and multifactorial in nature The biopsychosocial model postulates that biological psychological and social factors all play a significant role in human functioning in the context of disease or illness which includes these disorders Evidence suggests that ADHD can predispose individuals to anxiety and vice versa However the causality sequences as explored in the literature remains limited It is possible that ADHD symptomology causes anxiety or the genetics behind ADHD causes anxiety symptoms Current research has adopted a more complex nuanced understanding of both disorders acknowledging the unique interactions of biological psychological and social factors and large datasets e g Dunedin datasets may help with developing a stronger causality sequence It s also noteworthy that severe

anxiety can look like ADHD but the treatment is totally different as ADHD meds Stimulants can make anxiety worse A
21st Century System for Evaluating Veterans for Disability Benefits Institute of Medicine, Board on Military and Veterans
Health, Committee on Medical Evaluation of Veterans for Disability Compensation, 2007-09-30 21st Century System for
Evaluating Veterans Disability Benefits recommends improvements in the medical evaluation and rating of veterans for the
benefits provided by the Department of Veterans Affairs VA to compensate for illnesses or injuries incurred in or aggravated
by military service Compensation is a monthly cash benefit based on a rating schedule that determines the degree of
disability on a scale of 0 to 100 Although a disability rating may also entitle a veteran to ancillary services such as vocational
rehabilitation and employment services the rating schedule is out of date medically and contains ambiguous criteria and
obsolete conditions and language The current rating schedule emphasizes impairment and limitations or loss of specific body
structures and functions which may not predict disability well 21st Century System for Evaluating Veterans Disability
Benefits recommends that this schedule could be revised to include modern concepts of disability including work disability
nonwork disability and quality of life In addition to the need for an updated rating schedule this book highlights the need for
the Department of Veterans Affairs to devote additional resources to systematic analysis of how well it is providing services
or how much the lives of veterans are being improved as well as the need for a program of research oriented toward
understanding and improving the effectiveness of its benefits programs
