**Shared Meanings in the Film Music of Philip Glass** Tristian Evans, 2016-03-03 The study of music within multimedia contexts has become an increasingly active area of scholarly research. However, the application of such studies to musical genres outside the classical film canon or in television and other media remains largely unexplored in any detail. Tristian Evans demonstrates how postminimal music interacts with other media forms, focusing on the film music by Philip Glass but also taking into account works by other composers such as Steve Reich, Terry Riley, John Adams, and others inspired by minimalist and postminimal practices. Additionally, Evans develops innovative ways of analysing this music based on an interdisciplinary approach and draws on research from areas that include philosophy, linguistics, and film theory. The book offers one of the first in-depth studies of Philip Glass's music for film, considering *The Hours* and *Dracula*. Naqoyqatsi, Notes on a Scandal, and Watchmen, while examining re-applications of the music in new cinematic and televisual contexts. The book will appeal to musicologists but also to those working in the fields of film music, cultural studies, media studies, and multimedia.

*Jaguar* Graham Robson, 2012-09-20 Sir William Lyons enjoyed a seemingly unstoppable rise to fame and fortune in the motor industry, and the Jaguar brand that he introduced became world famous. Yet it did not happen overnight. In the 1920s he was in Blackpool styling motorcycle sidecars, and in the 1930s in Coventry developing the SS motor car, with the stand-alone Jaguar company not appearing until 1945. The company's success was aided by the amazing new XK engine of 1948, by motor racing success at Le Mans, and by the stunning styling of cars like the XK120, the Mk 2 saloons, and the extraordinary E-Type. Graham Robson here explores the history of the Jaguar company and its many classic marques.

**Lead and Zinc** Nnamdi Anyadike, 2002-03-15 Annotation Lead has come under attack from environmental legislation, but the lead industry is far from pessimistic about its prospects. Demand for lead for SLI batteries is rising along with growth in new car demand in Eastern Europe, China, the rest of the Far East, and Latin America, while in the developed world the demand for replacement SLI batteries is a constant and growing feature. Over 80% of all the lead now used in the US is for the production of lead acid batteries. Global zinc mine output is expected to rise by 4.2% to 9Mt in 2001, this is mainly as a consequence of increased output at the Lisheen mine in Ireland, additions to capacity in Mexico and Peru, and a further rise in output at the many small mines spread throughout China. However, these rises will be partially balanced by reductions in Canada, Japan, Spain, Sweden, and Turkey. Up to date in-depth research and analysis to make you an authority on the world's major nickel markets. This report examines these two closely related metals individually, analyzing the key issues for the future, including the impact of developments in the environmental arena and the recycling marketplace. Some key findings of

this report Several new zinc producing mines in Australia will also yield significant amounts of lead including Pillara Century and George Fisher which will produce 34 000tpy 45 000tpy and 100 000tpy of contained lead respectively A forecast rise of 2.9% to 3.03 million tonnes resulted in global lead mine output exceeding 3Mt for the first time in 2001 In the Western World output increased by 2.2% to 2.27Mt The automotive industry is currently one of the most important consumers of zinc and is set to remain so while steel remains the basic material of car manufacturing Galvanised steel housing is said by some commentators to be the fastest growing market for zinc in the world The battery sector is also increasingly important with the prospect of new products coming onto the market in the next few years Batteries now account for around 73% of Western World demand for lead up from just over 50% in 1985 This share is forecast to rise to 80% by 2010 driven mainly by growth in demand from motor vehicles
