Mittermeir, 2011-11-10 This book constitutes the refereed proceedings of the 5th International Conference on Informatics in Schools Situation Evolution and Perspectives ISSEP 2011 held in Bratislava Slovakia in October 2011 The 20 revised full papers presented were carefully reviewed and selected from 69 submissions A broad variety of topics related to teaching informatics in schools is addressed ranging from national experience reports to pedagogical and methodological issues The papers are organized in topical sections on informatics education the spectrum of options national perspectives outreach programmes teacher education informatics in primary schools advanced concepts of informatics in schools as well as competitions and exams *Informatics Education - Supporting Computational Thinking* Roland Mittermeir, Maciej M. Syslo, 2008-06-27 Informatics Education Supporting Computational Thinking contains papers presented at the Third International Conference on Informatics in Secondary Schools Evolution and Perspective ISSEP 2008 held in July 2008 in Torun Poland As with the proceedings of the two previous ISSEP conferences 2005 in Klagfurt Austria and 2006 in Vilnius Lithuania the papers presented in this volume address issues of informatics education transcending national boundaries and the fore transcending differences in the various

national legislation and organization of the educational system Observing these issues one might notice a trend The proceedings of the First ISSEP were termed From Computer Literacy to Informatics Fundamentals 1 There broad room was given to general education in ICT The ECDL the European Computer Driving License propagated since the late 1990s had penetrated school at this time already on a broad scale and teachers parents as well as pupils were rather happy with this situation Teachers had material that had a clear scope was relatively easy to teach and especially easy to examine Parents had the assurance that their children learn modern and relevant stuff and for kids the computer was sufficiently modern so that anything that had to do with computers was considered to be attractive Moreover the difficulties of programming marking the early days of informatics education in school seemed no longer relevant Some colleagues had a more distant vision though
