Gesetzliche Unfallversicherung (DGUV),2019-05-30 In May 2019 the Institut für Arbeitsschutz der Deutschen Gesetzlichen
Unfallversicherung IFA was hosting the 14th International Conference on Hand Arm Vibration The event is organised every
four years under the auspices of international expert bodies at changing places It is aimed at all stakeholders in the subject
whether experts from the occupational safety and health and research communities or management personnel in the areas of
manufacture and design Mechanized manual work is often associated with exposure to vibration that may impact adversely
upon the health and well being of the affected individuals Besides impairments to comfort and performance harm to the hand
arm system possibly permanent must be prevented as a matter of priority In a world of work that is becoming more and more
complex combined exposures are also becoming increasingly relevant What influence does hand arm vibration have in
conjunction with noise or whole body vibration What contribution can be made by medicine diagnostics epidemiology
measurement technology and prevention to the identification and containment of risks and better still to their elimination
What is the role of international regulatory activity in this context The 14th International Conference on Hand Arm Vibration
aimed to address these and many other questions concerning hand arm vibration and to find answers relevant to the field

Guide for Strengthening of Concrete Structures FIB - International Federation for Structural Concrete,2022-05-01

The idea of preparing a technical document for the repairs and interventions upon concrete structures goes back to the
former fib COM 5 Structural Service Life Aspects being the goal of the then TG 5 9 After a long period of reduced activity
and taking into account the reorganization of fib commissions that meanwhile took place on June 2017 a different approach
was proposed to push forward the task of TG 8 1 formerly TG 5 9 The new goal of TG 8 1 was to deliver a how to do guide
gathering together protection repair and strengthening techniques for concrete structures Chapters are intended to provide
both guidelines and case studies serving as support to the application of fib MC 2020 pre normative specifications Each
chapter was written by an editorial team comprising desirably at least a researcher a designer and a contractor Templates
have been prepared in order to harmonize the contents and the presentation of the different methods Following the writing
process chapters were reviewed by experts and after amendments by the authors they underwent a second review process by

COM 8 and TG 3 4 members as well as by different practitioners For each protection repair and strengthening method addressed in this guide readers have a description of when to adopt it which materials and systems are required which techniques are available and what kind of equipment is needed It then presents a summary of stakeholders roles and qualifications design guidelines referring to most relevant codes and references the intervention procedure quality control measures and monitoring and maintenance activities Due to the extent of the guide it was decided to publish it as bulletin 102 addressing protection and repair methods and bulletin 103 addressing strengthening methods We would like to thank the authors reviewers and members of COM 8 and TG 3 4 for their work in developing this fib Bulletin which we hope will be useful for professionals working in the field of existing concrete structures especially those concerned with life cycle management and conservation activities As noted above this Bulletin is also intended to act as a background and supporting document to the next edition of the fib Model Code for Concrete Structures which is currently under development under the auspices of TG10 1 with the working title of fib Model Code 2020
