HIPAA

Health Insurance Portability and Accountability Act – federal legislation that mandates confidentiality and protection of patients' personal health information. It defines the rights and privileges of patients for protection of privacy.

Confidentiality – act of keeping information private or secret; in healthcare, the nurse shares information about a patient only with other nurses or healthcare providers who need to know private information about a patient to provide care for them information can only be shared with the patient's consent

Advanced Directive – legal documents that provide instructions for medical care and only go into effect if the patient is unable to communicate their own wishes.

Patient Self-Determination Act is a federal statute that requires health care institutions to provide information to patients regarding their rights to make informed decisions about their care, including the right to create an advanced directive.

Informed Consent – a patient:

- is given full and complete information about the purpose of a study, procedure, data collection, potential harm and benefits, and alternative methods of treatment.

- is capable of fully understanding the research and the implications of participation

- has the power of free choice to voluntarily consent or decline participation in the research/procedure

- understand how the research maintains confidentiality or anonymity

- explanation of alternative procedures

Nurse's only responsibility when it comes to consent: witnessing.
