Developing Culturally Responsive Learning Environments in Postsecondary Education R. Jason Lynch,Charmion B. Rush,2024-01-01 U S colleges and universities are rapidly diversifying In 2018 the U S Census Bureau estimated that nearly half of undergraduate students were of non white racial identities with that number only increasing for future generations This increase in diversity holds true for many other identity groups Yet faculty demographics remain disproportionately white and male For years students have called for institutions of postsecondary education to support their success through adopting more culturally relevant practices for teaching and learning Scholarship on student success in college has also echoed this call Developing Culturally Responsive Learning Environments in

Postsecondary Education was developed to help postsecondary educators answer this call through a multilayered view of student support within the college classroom and beyond. Specifically, this book features twenty-three chapters divided into four parts. Each part corresponds with four thematic areas identified as an important component in developing culturally responsive learning environments: unpacking educator cultural competence, learning experiences of the 21st-century college student, culturally responsive teaching and instruction, and transforming curriculum content and environments. Authors representing diverse backgrounds and institutional contexts come together to offer their own scholarly and practical expertise to tackle issues ranging from combating implicit bias and building cultural competence to exploring specific student experiences and practical ways to implement culturally responsive pedagogies. In addition to each chapter, this volume provides a companion case scenario exercise for you to directly apply the content from the book. Ultimately, we hope this book provides you with a meaningful starting place to help you honor the diversity of your students and support their success within your learning context.

Early Holistic Scoring of Writing Richard Haswell, Norbert Elliot, 2019-11-01
 What is the most fair and efficient way to assess the writing performance of students? Although the question gained importance during the US educational accountability movement of the 1980s and 1990s, the issue had preoccupied international language experts and evaluators long before. One answer to the question, the assessment method known as holistic scoring, is central to understanding writing in academic settings. *Early Holistic Scoring of Writing* addresses the history of holistic essay assessment in the United Kingdom and the United States from the mid-1930s to the mid-1980s and newly conceptualizes holistic scoring by philosophically and reflectively reinterpreting the genre's origin, development, and significance. The book chronicles holistic scoring from its initial origin in the United Kingdom to the beginning of its heyday in the United States. Chapters cover little-known history from the holistic scoring of school certificate examination essays written by Blitz evacuee children in Devon during WWII to teacher adaptations of holistic scoring in California schools during the 1970s. Chapters detail the complications, challenges, and successes of holistic scoring from British high-stakes admissions examinations to foundational pedagogical research by Bay Area Writing Project scholars. The book concludes with lessons learned, providing a guide for continued efforts to assess student writing through evidence models. Exploring the possibility of actionable history, *Early Holistic Scoring of Writing* reconceptualizes writing assessment.
