How To Report An Image On Photobucket:

Algorithms of Oppression Safiya Umoja Noble, 2018-01-08 A revealing look at how negative biases against women of color are embedded in search engine results and algorithms Run a Google search for black girls what will you find Big Booty and other sexually explicit terms are likely to come up as top search terms But if you type in white girls the results are radically different The suggested porn sites and un moderated discussions about why black women are so sassy or why black women are so angry presents a disturbing portrait of black womanhood in modern society In Algorithms of Oppression Safiya Umoja Noble challenges the idea that search engines like Google offer an equal playing field for all forms of ideas identities and activities Data discrimination is a real social problem Noble argues that the combination of private interests in promoting certain sites along with the monopoly status of a relatively small number of Internet search engines leads to a biased set of search algorithms that privilege whiteness and discriminate against people of color specifically women of color Through an analysis of textual and media searches as well as extensive research on paid online advertising Noble exposes a culture of racism and sexism in the way discoverability is created online As search engines and their related companies grow in importance operating as a source for email a major vehicle for primary and secondary school learning and beyond understanding and reversing these disquieting trends and discriminatory practices is of utmost importance An original surprising and at times disturbing account of bias on the internet Algorithms of Oppression contributes to our understanding of how racism is created maintained and disseminated in the 21st century

Frohlich,2011-02-09 From Snapshots to Social Media describes the history and future of domestic photography as mediated by technological change Domestic photography refers to the culture of ordinary people capturing sharing and using photographs and is in a particular state of flux today as photos go digital The book argues that this digital era is the third major chapter in the 170 year history of the area following the portrait and Kodak eras of the past History shows that despite huge changes in photographic technology and the way it has been sold people continue to use photographs to improve memory support communication and reinforce identity The future will involve a shift in the balance of these core activities and a replacement of the family album with various multimedia archives for individuals families and communities This raises a number of issues that should be taken into account when designing new technologies and business services in this area including the ownership and privacy of content multimedia standards home ICT infrastructure and younger and older users of images The book is a must for designers and engineers of imaging technology and social media who want a better understanding of the history of domestic photography in order to shape its future It will also be of value to students and researchers in science and technology studies and visual culture as a fascinating case study of the evolving use of photographs and photographic technology in Western society
