Managing Religious Tourism Maureen Griffiths, Peter Wiltshier, 2019-02-08 *Managing Religious Tourism* provides a global view of the tools and resources used in demand and supply management in the context of pilgrimage and religious tourism. With a focus on toolkits and best practices, the book reinforces the quality of service provision and offers a reflection on consumers' perspectives and what drives their purchasing decisions with regards to a variety of destinations. These central themes are complemented by an understanding of management responses to consumer behaviour and mobility, accessibility, individualism, and tourism for both sacred and secular purposes. The book also examines the ways in which networks, partnerships, and the conceptual stakeholder approach can be employed by religious tourism suppliers working with destination management organisations. The text promotes sustainable development and a triple bottom line focus, with all chapters supporting policy for framing development. Key features include: Global perspective on tools as well as management approaches and techniques; Emphasis on sustainability in connecting sacred and secular consumers; Focus on promoting learning and development within this important tourism sector.

Community-Oriented Health Services Elias Mpofu, 2014-12-08 Grounded in a transdisciplinary approach, this groundbreaking text provides extensive evidence-based information on the value of communities as the primary drivers of their own health and well-being. It describes foundational community health concepts and procedures and presents proven strategies for engaging communities as resources for their own health improvement, an important determinant of individual well-being. It is based on recommendations by the World Health Organization's International Classification of Functioning, Disability, and Health and on the premise that healthy communities are those with populations that participate in their own health promotion, maintenance, and sustenance. The book is unique in its integration of environmental and social justice issues as they significantly affect the advancement of community health. The text focuses on community-oriented health interventions informed by prevention, inclusiveness, and timeliness that both promote better health and are more cost-effective than individually focused interventions. It addresses the foundations of community-oriented health services, including their history, social determinants, concepts, and policies, as well as the economics of community-oriented health services and health disparities and equity. It covers procedures for designing, implementing, monitoring, and evaluating sustainable community health coalitions, along with tools for measuring their success. Detailed case studies describe specific settings and themes in U.S. and international community health practice in which communities are both enactors and beneficiaries. An accompanying instructor's manual provides learning exercises, field-based experiential assignments, and multiple-choice questions. A valuable resource for students and practitioners of education, public policy, and social services, this book bridges the perspectives of environmental justice, public health, and community well-being and development, which while being mutually interdependent, have rarely been considered together.
