Le Manuel officiel d'interrogatoire et de manipulation de la CIA (Traduit) Central Intelligence Agency, 2025-07-29 Documents officiels de la CIA classifiés par la CIA. IMPORTANT ce manuel a été publié pour la première fois en 1997 en vertu de la loi sur la liberté d'information après avoir été largement expurgé. Il a été publié nouveau en 2014 avec un grand nombre de documents supplémentaires. Contrairement aux anciennes versions disponibles qui ne contiennent que le contenu de 1997 cette édition contient en fait les deux versions. Obtenir des renseignements exploitables d'un suspect peu coopératif est une tâche extrêmement difficile. Lorsque les enjeux sont aussi importants que ceux des enquêtes de contre-espionnage antisoviétiques de la guerre froide ces difficultés sont multipliées. Ce manuel unique d'ordres de la CIA classifié examine sans concession et en profondeur les techniques utilisées par les interrogateurs de la CIA chargés de traquer et de démasquer les taupes, les agents dormants, les agents doubles et bien d'autres encore. Il fournit à l'auditeur les outils nécessaires pour lire, interroger, influencer, manipuler et finalement briser même les sujets les plus récalcitrants ainsi que la capacité de reconnaître quand ces techniques puissantes sont utilisées contre vous.

Hypnosis Between Science and Magic Isabelle Stengers, 2024-11-14 What if judgment returned to the craft of magic? How would that relieve the burdens of critique and realign its priorities? These questions regarding the value of magic to thinking are at the very heart of the acclaimed philosopher of science Isabelle Stengers' political and philosophical thought and her insistence that the smoke of the burned witches still hangs in our nostrils. Now in the first English translation of this classic text *Hypnosis Between Science and Magic* provides an entry point to the work of Isabelle Stengers who has so originally and forcefully shifted how we think about the history of ideas. The book focuses in on an area of her thought that has recurred throughout her career: the

presumed antagonism between magic and science and especially the evacuation of magic from all that is thought to be scientifically valid

A Critique of Psychoanalytic Reason Léon Chertok, Isabelle Stengers, 1992 This original and provocative work begins by examining the shift of scientific paradigms that took place in the late eighteenth century a shift illustrated by the report of a French Royal Commission appointed in 1784 to investigate Mesmerism The reactions to Mesmerism among the Commission members in particular the chemist Lavoisier and the botanist Jussieu crystallized conflicts about the notion of reason and its role as a scientific ideal about how science ought to be done The Commission's denunciation of Mesmerism as the work of the imagination then serves as the starting point for the authors' reconsideration of the history of psychoanalysis notably its suppression and repression of phenomena associated with hypnosis imagination suggestion and empathy in its search to establish itself as a science in accord with the new ideal of scientific reason Examining the new and often troubled relationship in psychoanalysis between therapeutic effectiveness and advances in theory the authors highlight the challenge to Freudian ideals in the 1920s by Otto Rank and Sandor Ferenczi The discrediting of Ferenczi engineered to a large extent by Ernest Jones and Freud himself was an attempt to purify psychoanalysis of the effects of suggestion The authors discuss Freud's own therapeutic nihilism occasioned by his recognition that suggestion by means of the transference relationship played an uncontrollable role in psychoanalytic therapy In assessing Freud's legacy the authors examine evolving notions of psychoanalysis especially the role played by the effects of suggestion in recent theoretical representations of the development of the subject Asserting that hypnosis and the challenge it poses to our understanding of human motivation reason and the mind-body relationship constitutes the fourth narcissistic wound to the human ego after those introduced by Copernicus Darwin and Freud the authors analyze Lacan's rejection of hypnosis and explain current resistance to hypnosis through its challenge to the modern scientific notion of reason
