Diamonds. a Study of the Factors That Govern Their Value Frank B. Wade, 2016-06-27 From the Foreword IN writing this little monograph on factors that govern the value of diamonds the author has attempted to put within limits not too wide to be covered by the busy diamond merchant much of the experience he has gained during the past fifteen years as a student of diamonds Some of the information contained in this volume is the common property of all who have given attention to the subject Part of it is to be found already in print in larger and more pretentious works A modest portion of the material is the result of original study at first hand especially such part as attempts to analyse various effects and to determine and explain their causes While most of the technical information contained in the following chapters might be learned of men who are now in the business many such have no time or taste for writing down what they have learned and others unfortunately regard some of these matters as trade secrets to be kept from the buying public The writer therefore feels that there is a place for such an essay and hopes that many who are serving their apprenticeship in the jewelry business and perhaps a few who are already recognized as diamond merchants may profit by the close study of this handbook In preparing these pages the author has also had the great American diamond buying public in mind and has even given over a short chapter to advice to the intending buyer of a diamond No other people buy diamonds so largely as Americans They buy the best and are usually at pains to inform themselves more thoroughly than other nationalities as to the points that determine the value of diamonds There is nothing within the pages of this book which a merchant who is conducting an

honest business in diamonds need fear to have become the property of the public The more discerning and intelligent the buying public becomes the better customer it will be in the long run In conclusion the author would extend his thanks to the many jewelers and diamond men who have courteously extended to him opportunities to study diamonds at first hand Most of the jewelers of Indianapolis should be included and in addition the author wishes gratefully to acknowledge much assistance from Mr Edward E Stone and Mr John O Hanion of Boston and Mr John H Baker of New York The admirable treatise on diamonds by W R Cattelle has also furnished much interesting information and confirmed much that was gathered at first hand

Diamonds; a Study of the Factors That Govern Their Value Frank Bertram Wade, 2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1916 edition Excerpt CHAPTER IV REPAIRING AND RECUTTING AND THEIR EFFECTS ON THE VALUE OF SOME DIAMONDS They are square and pointed of their own kind both above and beneath without work of man s hand and they grow together male and female and are nourished by the dew of heaven and they engender commonly and bring forth small children that multiply and grow all the year I have oftentimes tried the experiment that if a man keep them with a little of the rock and wet them with May dew often they shall grow every year and the small will grow great for right as the fine pearl congeals and grows great by the dew of heaven right so doth the true diamond and right as the pea l of its own nature takes roundness so the diamond by virtue of God takes squareness The Voyages and Travels of Sir John Maundeville THE previous chapters on colour flaws and make in connection with the value of diamonds have been of general application The present chapter dealing as it does with repairing and recutting does not apply to every diamond but only to the few stones that come to grief or to those which for one reason or another were not well made when originally cut Notwithstanding the fact that it is only occasionally that a dealer in diamonds is called upon to use his knowledge of what may be done in the way of repairing or recutting there is considerable need of an adequate knowledge of the matter for use on such occasions Many jewellers have suffered unnecessary losses through lack of a complete understanding of the possibilities Some attempt will therefore be made to acquaint those who may lack experience with the usual kinds of injuries that occur to diamonds and with the possibilities as to the repair of such injuries and the effect upon

Genesis of Diamonds and Associated Phases Yuriy A. Litvin, 2017-05-17 This book presents an overview of recent advances in our understanding of the genesis of diamonds and the associated phases It is divided into three main parts starting with an introduction to the analysis of diamond inclusions to infer the formation processes In turn the second part of the book presents high pressure experimental studies in mantle diamond parental mineral systems with representative multicomponent boundary compositions The experimental syngensis phase diagrams provided reveal the physicochemical mechanisms of diamond nucleation and substantiate the mantle carbonatite concept of the genesis of diamonds and associated phases Lastly the book describes the genetic classification of diamond hosted mineral inclusions

and experimentally determined RE mineral parental melt partition coefficients The physicochemical experimental evidence presented shows the driving forces behind the fractional evolution of the mantle magmas and diamond parental melts Given the depth and breadth of its coverage the book offers researchers essential new insights into the ways diamonds and associated minerals and rocks are naturally created
