**Multiple Affordances of Language Corpora for Data-driven Learning** Agnieszka Leńko-Szymańska, Alex Boulton, 2015-05-15 In recent years corpora have found their way into language instruction albeit often indirectly through their role in syllabus and course design and in the production of teaching materials and other resources An alternative and more innovative use is for teachers and students alike to explore corpus data directly as part of the learning process This volume addresses this latter application of corpora by providing research insights firmly based in the classroom context and reporting on several state of the art projects around the world where learners have direct access to corpus resources and tools and utilize them to improve their control of the language systems and skills or their professional expertise as translators Its aim is to present recent advances in data driven learning addressing issues involving different types of corpora for different learner profiles in different ways for different purposes and using a variety of different research methodologies and perspectives

**Questions** Veneeta Dayal, 2016 This book synthesizes and integrates 40 years of research on the semantics of questions and its interface with pragmatics and syntax conducted within the formal semantics tradition A wide range of topics are covered including weak strong exhaustiveness maximality functional answers single multiple trapped list answers embedding predicates quantificational variability concealed questions weak islands polar and alternative questions negative polarity and non canonical questions The literature on this rich set of topics theoretically diverse and scattered across multiple venues is often hard to assimilate Veneeta Dayal drawing on her own research brings them together for the first time in a coherent concise and well structured whole Each chapter begins with a non technical introduction to the issues discussed semantically sophisticated accounts are then presented incrementally with the major points summarized at the end of each section Written in an accessible style this book provides both a guide to one of the most vibrant areas of research in natural language and an account of how this area of study is developing It will be a unique resource for the novice and expert alike and seeks to appeal to a variety of readers without compromising depth and breadth of coverage

**Static Analysis** Radhia Cousot, 2003-05-28 Static analysis is a research area aimed at developing principles and tools for verification and semantics based manipulation of programs and high performance implementations of programming languages The series of Static Analysis workshops has served as the primary venue for presentation and discussion of theoretical practical and application advances in the area This volume

contains the papers accepted for presentation at the 10th International Static Analysis Symposium SAS 2003 which was held June 11-13 2003 in San Diego California USA. Firmly established as a leading forum in the static analysis area, SAS 2003 received 82 high quality submissions. Each paper was carefully reviewed, being judged according to scientific quality, originality and relevance to the symposium topics. Following on-line discussions, the program committee met in Paris, France, at the Ecole Normale Supérieure on March 15 2003 and selected 25 papers. In addition to the contributed papers, this volume includes an invited paper by Manuel Hermenegildo, Technical University of Madrid and University of New Mexico, and the abstract of an invited talk by Ken McMillan, Cadence Berkeley Laboratories. On behalf of the Program Committee and the General Chair, I would like to thank the authors of the submitted papers and the external referees who provided timely and significant reviews. I owe special thanks to Jacques Beigbeder from Ecole Normale Supérieure for managing the submission site and the developers of CyberChair for the use of their software. On this occasion, SAS was sponsored by the Association for Computing Machinery (ACM) and was held as part of the Federated Computing Research Conference (FCRC) 2003. I would like to thank all organizing committee members for all their tremendous work.

Assessment Tools for Mapping Learning Outcomes With Learning Objectives Sinha, G. R., 2020-09-25. In educational institutions, outcome-based education (OBE) remains crucial in measuring how certain teaching techniques are impacting the students' ability to learn. Currently, these changes in students are mapped by analyzing the objectives and outcomes of certain learning processes. International accreditation agencies and quality assessment networks are all focusing on mapping between outcomes and objectives. The need of assessment tools arises that can provide a genuine mapping in the global context so that students or learners can achieve expected objectives. Assessment Tools for Mapping Learning Outcomes With Learning Objectives is a pivotal reference source that provides vital research on the implementation of quality assessment methods for measuring the outcomes of select learning processes on students. While highlighting topics such as quality assessment, effective employability, and student learning objectives, this book is ideally designed for students, administrators, policymakers, researchers, academicians, practitioners, managers, executives, strategists, and educators seeking current research on the application of modern mapping tools for assessing student learning outcomes in higher education.
