Building a Website: Designing a Website with HTML and CSS

1. Introduction to HTML and CSS

The first step in building a website is to understand the basic concepts of HTML and CSS. HTML is the language used to create the structure of a website, while CSS is used to style the website.

This document is designed to help you understand the basic concepts of HTML and CSS. It covers the following topics:

- What is HTML and CSS?
- How to create a website using HTML and CSS.
- How to style a website using CSS.
- How to create a responsive website.

The document is divided into two main sections: HTML and CSS. The HTML section covers the basic concepts of HTML, while the CSS section covers the basic concepts of CSS.

2. HTML Basics

HTML is the language used to create the structure of a website. It is a markup language that uses tags to define the elements of a document. The basic elements of HTML are:

- Elements: These are the building blocks of a website. They are defined by tags and contain content.
- Attributes: These are used to provide additional information about an element.
- Comments: These are used to add notes to the code.

The document covers the following topics:

- What is HTML?
- How to create a website using HTML.
- How to style a website using CSS.
- How to create a responsive website.

3. CSS Basics

CSS is the language used to style a website. It is a style sheet language that uses rules to define the appearance of a document. The basic elements of CSS are:

- Selectors: These are used to select the elements to be styled.
- Properties: These are used to define the style of the selected elements.
- Values: These are used to define the values of the properties.

The document covers the following topics:

- What is CSS?
- How to create a website using CSS.
- How to style a website using CSS.
