

## STUDYING PEDIGREES ACTIVELY

**Genealogical** is gathering or creating a tree that depicts a family history or the transmission of a specific trait. They can be interesting in their own right but important tools in identifying patterns of inheritance of specific traits. Pedigrees can also demonstrate genetic relationships without involving a complex debate on how pedigree charts should be constructed and generally identified structures to use to build families. They are also useful tools for identifying and understanding pedigree relationships to a specific family history. Here are some examples of pedigree charts.
