Application of the HEC-5 Hydropower Routines Vernon R. Bonner, 1983 *Sustainable Hydropower in West Africa* Amos T. Kabo-Bah, Chukwuemeka J. Diji, 2018-01-02

Sustainable Hydropower in West Africa Planning Operation and Challenges provides a comprehensive overview of the planning deployment and management of hydropower in West Africa and similar regions. The authors use a practical approach to analyze available technology modeling methodologies and sustainability aspects such as the dependence between climate and hydropower and socio economic and environmental impacts. They discuss the need for innovative solutions and how to close research gaps in the field for this region. Although more than 50% of West Africa's hydropower potential is still untapped, re engineering and maintenance of existing hydropower plants is a key issue and is discussed. Issues of productivity and optimization are also covered as well as the introduction of new technology and integration of hydropower into existing energy systems renewable energy systems in particular. Policy and regulation are also examined considering competing needs when managing water resources. The final chapter offers a summary of activities strategies policies and technology for easy reference and practical use. Due to its wide coverage and real life examples, this is a useful reference for engineering professionals in the field of hydropower working in West Africa and regions with similar conditions. This book helps engineers make technology and location decisions for planning deploying and operating hydropower plants. The book's accessible language and international authorship also allows for easy use by energy researchers analysts and policy makers who need information for the analysis modeling financing implementation and regulation of hydropower in West Africa and related regions. Presents the most current issues related to hydropower deployment and management in West Africa and regions with similar conditions. Discusses key challenges focusing on practical aspects and methodologies. Explores the technological sustainability and economic aspects to be considered when deploying operating and maintaining hydropower plants in West Africa and similar regions.
