ABSTRACT. The authors have examined the effect of the concentration of the solution of the monomer on the rate of polymerization of styrene in the presence of a catalyst. The results show that the rate of polymerization increases with the concentration of the monomer. The authors also have examined the effect of the concentration of the catalyst on the rate of polymerization. The results show that the rate of polymerization increases with the concentration of the catalyst. The authors have also examined the effect of the temperature on the rate of polymerization. The results show that the rate of polymerization increases with the temperature.
