Globalization or Regionalization of the American and Asian Car Industry? M. Freyssenet, K. Shimizu, G.

Volpato, 2003-04-15 The automobile sector is one of the most archetypal global industries and is seen by many as one of the main drivers behind the homogenisation of world markets due to firms internationalization strategies and the social practices that firms impose. This book argues that this is not entirely the case due to the heterogeneity of firms and the diversity of strategies pursued. It highlights the diversity and forms of internationalization and the preference for regionalization rather than globalization that has occurred over the past decade. This book looks specifically at the American and Asian car industry.

Dream Giuliano Molineri, Paolo Tumminelli, 2008 The history of cars in Torino has developed along two lines. The region has been mass producing cars for a century yet has never stopped fuelling hotbeds of creativity, craftsmanship and technology expressed in one-off vehicles, prototypes and dream cars. Digital Design Paolo Martegani, Riccardo

Montenegro, 2000-09-01 The era of digitalisation is bringing about radical changes. We are surrounded by objects which are causing our relationship with the world around us to become increasingly intangible and virtual. Even the work of the designer is changing, coupled with the traditional principles of aesthetics and practicality. Concepts such as communication, multimedia, virtuality are now important tools of the trade. Today's designers are confronted with a variety of complex demands and the computer offers an extremely flexible and creative way of meeting them. This book examines the many developments and changes which the digital age has effected in the field of design. *Direct Injection Systems* Cornel C Stan, 2002-11-05 Direct Injection Systems: The Next Decade in Engine Technology explores potentials that have been recognized and successfully applied, including fuel direct injection, fully variable valve control, downsizing, operation within hybrid scenarios and use of alternative fuels. **The Second Automobile Revolution** M. Freyssenet, 2009-04-30 The rapid takeoff of the continent-sized national economies and the increasing expense of extraction have led to strong tensions in petrol prices and a race towards alternative driving systems. This book analyses the emergence of a second automobile revolution through the trajectories of automobile firms since the nineties. **Toscana e Umbria** Stefano Baldi, 2001

Luxury Patrizia Calefato, 2014-04-10 Luxury has been both celebrated and condemned throughout history right up to the present day. This groundbreaking text examines luxury and its relationship with desire, status, consumption and economic value, exploring why luxury remains prominent even in the context of a global recession. Using approaches from cultural studies, semiotic research and aesthetics, *Luxury* presents a wide range of case studies including urban space and new technologies, travel, interior design, cars, fashion, ads and jewellery to explore what luxury represents and why in the contemporary world. The book will be essential reading for students and scholars across a range of fashion studies, cultural studies and sociology, and anyone interested in the power and allure of luxury today. **Auto e fisco** Albino Leonardi, Simone
