

Largest Hamburger Ever?

Mallie's Sports Grill, a Michigan restaurant, recently made an approximately 350 pound burger in an effort to set the world record for the largest hamburger ever made. It looks delicious. Here are the details:

It takes 20 hours to bake 270 pounds of hamburger and eight hours to cool it in a freezer.

The burger cooks down to a 180-pound patty. You lose about 90 pounds as it becomes grease!

The burger details:

180-pound ground beef patty

its bun weighs 100 pounds.

Mallie's uses 20 pounds of American cheese,

15 pounds of tomatoes,

15 pounds of onions,

10 pounds of pickles,

10 pounds of bacon

and 10 pounds of lettuce.

1. How much does this burger, with all the toppings weigh?
2. I can't believe you lose so much of the hamburger when it is cooked. In this case the burger started out weighing 270 pounds and ended up weighing 180 pounds after cooking. I have consumed burgers that weighed one pound before cooking. Assuming the weight of the original beef, beef that becomes grease and final burger weight are proportional what part of the original one pound burger should remain after cooking?
3. If this restaurant wants to have a 400 pound patty after it has been cooked, what weight should they start out with? It took 20 hours to cook the 270 pound burger, so how long should it take them to cook this larger burger?
