The Learning and Development of Mathematics

Teacher Educators Merrilyn Goos, Kim Beswick, 2021-04-07 Research in mathematics teacher education as a distinctive field of inquiry has grown substantially over the past 10-15 years Within this field there is emerging interest in how mathematics teacher educators MTEs themselves learn and develop Until recently there were few published studies on this topic and the processes by which mathematics teacher educators learn and the forms of knowledge they require for effective practice had not been systematically investigated However researchers in mathematics education are now beginning to investigate the development of MTE expertise and associated issues This volume draws on the latest research and thinking in this area is therefore timely to stimulate future development and directions It will survey the emerging field of inquiry in mathematics education combining the work of established scholars with perspectives of newcomers to the field with the aim of influencing development of the field invite cross cultural comparisons in becoming a mathematics teacher educator by highlighting issues in the development of MTEs in different countries and examine the roles of both mathematics educators and mathematicians in preparing future teachers of mathematics The primary audience will be university based mathematics teacher educators and MTE researchers and postgraduate research students who are seeking academic careers as MTEs Additional interest may come from teacher educators in disciplines other than mathematics and education policy makers responsible for accreditation and quality control of initial teacher education programs

Schnaubelt,Birgit Schörkhuber,2020-10-01 Wave phenomena are ubiquitous in nature Their mathematical modeling simulation and analysis lead to fascinating and challenging problems in both analysis and numerical mathematics These challenges and their impact on significant applications have inspired major results and methods about wave type equations in both fields of mathematics The Conference on Mathematics of Wave Phenomena 2018 held in Karlsruhe Germany was devoted to these topics and attracted internationally renowned experts from a broad range of fields These conference proceedings present new ideas results and techniques from this exciting research area **Foundations of Mathematics**

Andrés Eduardo Caicedo,James Cummings,Peter Koellner,Paul B. Larson,2017-05-12 This volume contains the proceedings of the Logic at Harvard conference in honor of W Hugh Woodin s 60th birthday held March 27 29 2015 at Harvard University It presents a collection of papers related to the work of Woodin who has been one of the leading figures in set theory since the early 1980s The topics cover many of the areas central to Woodin s work including large cardinals determinacy descriptive set theory and the continuum problem as well as connections between set theory and Banach spaces recursion theory and philosophy each reflecting a period of Woodin s career Other topics covered are forcing axioms inner model theory the partition calculus and the theory of ultrafilters This volume should make a suitable introduction to Woodin s work and the concerns which motivate it The papers should be of interest to graduate students and researchers in both mathematics and philosophy of mathematics particularly in set theory foundations and related areas **Generic Stabilizers in Actions of Simple Algebraic Groups**
