Identity
Traditionally, there has been speculation that the Bufo was an extraordinary member of the order crocodilia. Tellingly, crocodiles or alligators are also called "bufo" by the Arawakan. There is large population of crocodiles which live in rivers in South Africa, quite far from open water, so an underground existence is not impossible for the perceived Indian crocodiles. Since the Bufo is described with numerous characteristics such as an elongated neck and a forked tongue. The native name of the Komodo dragon is "Land Crocodile". Both Bernard Huxley, and Ray Marshall regard the Bufo to be a large Komodo dragon-like monster lizard, and there are fossils of such a creature from Western India under the name of "Javan" where they seem to merge into the Iranian crocodilian dragon or the Chinese dragon. George Eberhart notes removal of a similar creature in the name of "Javan", which in Iranian set in basically a local stylistic adaptation of the Chinese dragon. George Eberhart notes removal of a similar creature in the Tiger market of Iran, called the afa, possibly the same thing as the Bufo. He also notes in his checklist of unknown animals that similar reports in the Bufo also come from Burma, and they might also relate to a reported Yind-like Miskong River monster.

Cryptozoologist Karl Shuker claims that the Bura was a giant lungfish noting that this provides a far more comprehensive, comparable match not only in terms of morphology but also with regard to behaviour. Shuker believes this explains the Bura's alleged ability to survive hidden at the bottom of lakes during the dry season. Shuker's view admirably does nothing to account for the various other horn-like creatures as cited in this article. It also does not account for the spotted fringes of the long neck and forked tongue.

Encyclopedia Of Cryptozoology:

Encyclopedia of Cryptozoology Michael Newton, 2016-10-05 On every continent and in every nation animals unrecognized by modern science are reported on a daily basis. People passionately pursue these creatures the name given to their field of study is cryptozoology. Coined in the 1950s the term literally means the science of hidden animals. When the International Society of Cryptozoology ISC was formed in 1982 the founders declared that the branch of science is also concerned with the possible existence of known animals in areas where they are not supposed to occur either now or in the past as well as the unknown persistence of presumed extinct animals to the present time or to the recent past. What makes an animal of interest to cryptology is that it is unexpected. This reference work presents a flesh and blood view of cryptozoology. Here 2 744 entries are listed the majority of which each describe one specific creature or type of creature. Other entries cover 742 places where unnamed cryptids are said to appear profiles of 77 groups and 112 individuals who have contributed to the field descriptions of objects and events important to the subject and essays on cryptotourism and hoaxes for example. Appendices offer a timeline of zoological discoveries annotated lists of movies and television series with cryptozoological themes a list of crypto fiction titles and a list of Internet websites devoted to cryptozoology.

The Illustrated Encyclopedia of Cryptozoology

Vlad Stankovic, 2022-10-17 This illustrated encyclopedia showcases and describes the mysterious cryptid creatures from around the world. Conceived as a blend of science and fantasy vintage and modern it is a visual guide to the world that lurks beyond our current knowledge of nature. It is a collection of colorful and fascinating menagerie of mysterious creatures that were witnessed and reported by people from around the world from the remote deserts of Australia to the high mountains of North America and beyond.

Cryptozoology A To Z Loren Coleman, Jerome Clark, 2013-05-07 The ultimate quest for the world's most mysterious creatures. The Loch Ness Monster Bigfoot the Abominable Snowman these are the names of the elusive beasts that have caught the eye and captured the imaginations of people around the world for centuries. Recently tales of these monsters have been corroborated by an increase in sightings and out of these legends a new science has been born cryptozoology the study of hidden animals. *Cryptozoology A to Z* the first encyclopedia of its kind contains nearly two hundred entries including cryptids the name given to these unusual beasts new animal finds and the explorers and scientists who search for them. Loren Coleman one of the world's leading cryptozoologists teams up with Jerome Clark editor and author of several encyclopedias to provide these definitive descriptions and many never before published drawings and photographs from eyewitnesses detailed accounts. Full of insights into the methods of these scientists exciting tales of discovery and the history and evolution of this field. *Cryptozoology A to Z* is the most complete reference ever of the newest zoological science.

Mysterious Creatures George M. Eberhart, 2002-12-17 A comprehensive guide to cryptozoology the quest to identify animals that have not been officially catalogued by science and to place these unknown animals into their proper zoological categories. In this fascinating two volume encyclopedia author George M Eberhart provides a

comprehensive catalog of nearly 1 000 cryptids unknown animals usually reported through eyewitness accounts and not yet described by science Cryptids are the stuff of folklore hoaxes and genuine scientific breakthroughs There are 400 now classified cryptids once considered either extinct or pure fantasy The cryptozoologist s job is to strip away the myth misidentification and mystery and separate fact from fiction Mysterious Creatures covers everything from dinosaurs and the emala ntouka an elephant killing dinosaur like animal of central Africa to searches for the Loch Ness monster Bigfoot and other cryptozoological hoaxes Entries about specific animals include the derivation or meaning of each cryptid s name its scientific name variant names a physical description behavior description of tracks habitat significant sightings present status and possible explanations Illustrations and photographs accompany many entries The book also includes resources and references for further information

Anthropology and Cryptozoology Samantha Hurn,2016-11-03 Cryptozoology is best understood as the study of animals which in the eyes of Western science are extinct unclassified or unrecognised In consequence and in part because of its selective methods and lack of epistemological rigour cryptozoology is often dismissed as a pseudo science However there is a growing recognition that social science can benefit from engaging with it for as social scientists are very well aware scientific categorisation and explanation represents just one of a myriad of systems used by humans to enable them to classify and make sense of the world around them In many cultural contexts myth folk classification and lived experience challenge the truth expounded by scientists With a reflexive anthropological approach and drawing on rich empirical and ethnographic studies from around the world this volume engages with the theoretical and methodological issues raised by reported sightings of unrecognised animals Bringing into sharp focus the anthropological value and challenges for methodology posed by beliefs about unclassified creatures Anthropology and Cryptozoology Exploring encounters with mysterious creatures will be of interest to anthropologists sociologists and geographers working in the fields of research methods anthrozoology mythology and folklore and human animal interaction
