Eating Promiscuously James McWilliams, 2017-05-01 A bold and bracing argument for the complete reimagining of the human diet by the critically acclaimed author of Just Food The human practice of farming food has failed There are 7 500 known varieties of domesticated apples we regularly eat about five Seventy five percent of the world s food derives from five animals and twelve plants Factory farmed meat is a major source of greenhouse gas emissions about 14 percent larger than transportation and consumes 75 percent of the water in drought prone regions such as the West We are stuck in a rut of limited choices and the vast majority of what we eat is detrimental to our health and the welfare of the planet But what if we

could eliminate agriculture as we know it What if we could start over James McWilliams s search for more expansive palate leads him to those who are actively exploring the fringes of what we can eat a group of outliers seeking nutrition innovation outside the industrial food system Here we meet insect manufacturers seaweed harvesters road kill foragers plant biologists and oyster farmers who seek to open both our minds and our mouths and to overturn our most basic assumptions about food health and ethics Eating Promiscuously generates hope for a more tasteful future one in which we eat thousands of foods rather than dozens with a new philosophy that could save both ourselves and our planet 1982 Industry and Product Classification Manual ,1982 *Industry and Product Classification Manual* United States.
