

# Equipment Maintenance Plan

The mission of the Regional Transit System (RTS) is to provide safe, reliable, clean, and well-maintained vehicles throughout the useful life of the asset. The function of the maintenance plan is to provide a consistent systematic program that will enable RTS to properly inspect, maintain and service vehicles while following the manufacturer's recommended maintenance schedule(s).

## Maintenance Plan Goals

It is the goal of RTS to operate a maintenance program using proven fleet management practices. Scheduling work allows time, materials, tools, equipment, and labor to be effectively managed. A maintenance plan has been adopted to make these goals attainable.

The maintenance plan is a "living document" including schedules and reports which will be updated periodically to reflect changes in maintenance policies, equipment, and program improvements.

The goals of the maintenance plan include:

- An effective preventive maintenance program;
- Defect Reporting;
- The proper management of parts, equipment, and fleet;
- A warranty recovery program;
- Quality assurance

## Fleet Summary

A physical inventory of equipment is kept on file by both the City's property control personnel and RTS. The fleet information is updated as changes occur in the fleet inventory.
