Interventional and Therapeutic Gastrointestinal Endoscopy Klaus Mönkemüller, C. Mel Wilcox, Miguel Muñoz-Navas, 2010 The aim of this book is to present a concise yet instructive overview of the most common interventional and therapeutic gastrointestinal endoscopic procedures. Although there exists a large amount of literature dealing with therapeutic endoscopy this publication stands out for several reasons. To begin with it has been written by a highly selected group of international experts who contribute their own tried and tested tips and tricks. The various techniques are described in a homogeneous fashion making it easy for the endoscopist to single out the important aspects for his or her own practice. Moreover the data presented follows evidence based guidelines but does not inundate the reader with confusing facts and numbers. Finally the book is illustrated like an atlas featuring real life pictures enhanced by explanatory drawings and algorithms. This textbook is directed at residents fellows gastroenterologists and surgeons interested in therapeutic endoscopy. As the majority of the procedures described are classics that have stood the test of time it will be a useful companion for many years to come.

Gastrix Gerhard Rogler, Peter Bauernfeind, Michael Fried, Christoph Gubler, Beat Müllhaupt, 2018 In daily medical practice physicians often use scores classifications and schematic diagnostic paths to make clear and comprehensive decisions. Treatment algorithms have also proven to be effective. However it has become increasingly difficult or even impossible to have all scores schemata and algorithms at hand and a search on the internet can be very time consuming. Gastrix solves this problem unlike classic gastroenterology and hepatology textbooks it summarizes all necessary information in the form of a pocket sized book. Gastroenterologists will thus have all relevant information easily available at all times.
