

USER ACTIVITY ERROR CODE GUIDE

Error	Description	Suggested Action
2ma	Multiple Cached Users Automatic login to a protected PDF failed due to multiple users cached in Adobe on this device.	Access protected PDF content by manually logging in. To re-enable automatic login (SSO like), the user will need to clear Adobe cache. The user will then have to log in manually once, after which their username will be cached on the device and used automatically for subsequent logins.
2p3	Inactive Document The user is trying to unlock a file that has been deactivated in Vitrium. It will show an 'X' beside the content in the Content tab.	No action required. This means Vitrium's DRM is working as someone deactivated this content for a reason. If, however, that content should be reactivated, then go to the Content tab in Vitrium and click the 'X' beside the content in question to reactivate it.
3yq	Account Not Found The user does not exist in Vitrium, or an invalid username was entered.	<p>If portal self-registration is <u>not</u> used in your business: Check to see if this user exists in Vitrium or in the system that Vitrium is integrated with (if you connect to a 3rd party system).</p> <p><u>If the user does exist</u>, ensure they are using the correct username and that the user record is active.</p> <p><u>If they do not exist</u>, you may need to add the user manually in Vitrium or in your other system.</p> <p>If portal self-registration is used in your business: The user likely didn't click on the verification code that was emailed to them. You can manually toggle their user record to be active (in Vitrium, go to Users and click the 'X' beside their name to activate them) or ask the user to click the verification link in the email that was sent to them (which may be in their junk or spam folder).</p>
