Screen Design Manual Frank Thissen, 2003-09-11 The Screen Design Manual provides designers of interactive media with a practical working guide for preparing and presenting information that is suitable for both their target groups and the media they are using. It highlights background information and relationships clarifying them with examples and encourages the further development of the language of digital media. In addition to the basics of perception and learning psychology, ergonomics, communication theory, imagery research, and aesthetics, the book also considers design navigation and orientation elements. Guidelines and checklists along with the comprehensive design of the book support the transfer of information into practice. Frank Thissen teaches multimedia didactics and information design at the University of Applied Sciences in Stuttgart. For over 10 years he has been developing computer-based training. He has worked for international companies such as Siemens AG and SAP AG. His research project explores the role of emotion in e-learning. www.frankthissen.de

Perception R. Held, H.W. Leibowitz, H.L. Teubner, 2012-12-06 This volume was designed to focus on the problems of perception and originally was to have been solely edited by Professor Hans Lukas Teuber who was a member of the editorial board which initiated production of the Handbook. Accordingly he issued invitations to a number of researchers asking them to contribute chapters written in a style described in his words: "I hope that no author will feel constrained to undertake a major search of the literature he could find in an area in which he has been quite active himself and in which here most of the issues are immediately obvious to him. In this way the writing of the chapter should be enjoyable rather than a chore; it should result in a personal account of the state of a given area rather than in an encyclopedic treatise. The field deserves this sort of summary, particularly if it is pointed toward the future and speeds the convergence of developments in sensory physiology and psychological studies of perception." With the growing burden of national and international commitments including departmental headship Professor Teuber felt that it would be wise to share the editorial responsibilities for this volume and accordingly asked Professors Richard Held and Herschel Leibowitz to co-edit the volume with him in the same spirit as outlined in his invitation to authors. They agreed to help in this task.
