The Dynamics of Technology G. Barbiroli,2013-03-14

Technology is taking on an increasingly central and determining role in so ciety and can provide contradictory results wealth on the one hand but also unemployment environmental imbalances and other social problems on the other Manufacturing techniques and production organization are chosen in every country based mainly on the specific needs of the companies while the real needs of each population are often quite different Already in order to prevent all forms of technology from becoming in creasingly invasive towards both the natural supply of resources and the specific though highly differentiated needs of humanity technological paths must be identified and followed which are capable of making the vari ous needs compatible from the standpoint of sustainable development the conservation and increase in value of natural resources and the quality of development This will become increasingly important in the future This goal is undoubtedly ambitious and difficult to achieve however evi dence of the problems caused by generalized uncontrolled use of technolo gy all over the world leads us to believe that intense efforts must be made to achieve this aim If not humankind runs the risk of an irreversible degra dation of the most important aspects of economic development and its quali ty Within this framework those companies that produce goods and services obviously occupy a central active role which they must play with a view both to competitiveness and overall qualification and to contributing to the objectives of sustainable development

Knowledge in the Making Gerardo Patriotta, 2003-03-27 Knowledge is a very seductive but elusive concept Following the wider debate about the emergence of the information age and the knowledge society recent years have seen an explosion of writings about organizational knowledge from different disciplinary and theoretical perspectives Yet theoretical development has not always been accompanied by sound empirical research Methodologies for studying knowledge as an empirical phenomenon are still lagging behind This book aims to fill the gap between theory method and practice by developing a phenomenological approach to the study of knowing in the context of organizing The book contributes to the fields of strategy and organization in three ways First it provides a critical review of the concepts debates and epistemological assumptions underpinning existing theories of organizational knowledge Second it develops a methodological framework for studying knowledge processes as an empirical phenomenon that is based on three methodological lenses time breakdowns and narratives Third drawing on the three lens framework the book presents a phenomenological enquiry on knowing and organizing processes within two large car manufacturing plants at Fiat Auto Italy The book highlights the need to re think organizational knowledge from an action based perspective and suggests a new vocabulary for understanding knowledge oriented phenomena in organizations The book is addressed both to scholars of strategy and organization and to reflective practitioners Academics will be stimulated to reflect upon concepts they normally take for granted and habitually use in their research The book is also suitable for young researchers and doctoral students whose research interests lie in the areas of knowledge and organization The Fiat case study on which the book is based offers interesting insights to practitioners as far as classical themes like change innovation and organizational design are concerned Contrary to mainstream knowledge management texts however this book does not provide any recipes about alleged best ways for managing organizational knowledge Rather it invites managers and practitioners to reflect about the repertoire of knowledge they possess and yet cannot articulate **The Oxford Handbook of Dante** Manuele Gagnoli, Elena Lombardi, Francesca

Southerden, 2021-03-25 The Oxford Handbook of Dante contains forty four specially written chapters that provide a thorough and creative reading of Dante s oeuvre It gathers an intergenerational and international team of scholars encompassing diverse approaches from the fields of Anglo American Italian and continental scholarship and spanning several disciplines philology material culture history religion art history visual studies theory from the classical to the contemporary queer post and de colonial and feminist studies The volume combines a rigorous reassessment of Dante s formation themes and sources with a theoretically up to date focus on textuality thereby offering a new critical Dante The volume is divided into seven

sections Texts and Textuality Dialogues Transforming Knowledge Space s and Places A Passionate Selfhood A Non linear Dante and Nachleben It seeks to challenge the Commedia centric approach the conviction that notwithstanding its many contradictions Dante s works move towards the great reservoir of poetry and ideas that is the Commedia in order to bring to light a non teleological way in which these works relate amongst themselves Plurality and the openness of interpretation appear as Dante s very mark coexisting with the attempt to create an all encompassing mastership The Handbook suggests what is exciting about Dante now and indicate where Dante scholarship is going or can go in a global context
