The valve cover gasket is made of a harder material than the engine block. It is important to ensure that the gasket is properly seated and that the engine block is properly sealed. If the gasket is not properly seated, it can cause oil leaks. To ensure proper sealing, install the valve cover gasket with the gasket facing outwards (engine block facing inwards).

After installing the valve cover gasket, install the valve cover. Tighten the valve cover bolts in the sequence shown.

If the valve manifold is to be changed, the 16 threaded holes for the injectors must be covered on the new intake manifold. **Valves and valve seats**

Because of the higher stress involved in gas operation:

- The inlet and exhaust valves are made of a harder material
- The inlet and exhaust valve seats and the valve stems are made of a harder material
