

## Compare and Contrast

- To **compare and contrast** means to tell how two or more things are *alike* and *different*.
- Clue words such as *like* and *as* can show similarities. Clue words such as *however* and *instead* can show differences.

**Directions** Read the following passage. Then answer the questions below.

**I**s the hand quicker than the eye? Sometimes. A magician may use quick, careful hand movements to make you think you have seen or heard something you haven't. Magicians also use optical illusions, images that fool the eye. These illusions often use mirrors, painted backdrops, or special lighting. Optical illusions make you think you see

something on the stage that is not there. Magicians also use illusions of sound to confuse an audience. You may hear someone's voice sounding like it comes from a box that is actually empty. You may hear the sound of a coin hitting the floor even if no coin has been dropped. Illusions like these make magic seem real.

1. How are the hand movements and optical illusions used by magicians similar?

2. How are these two kinds of visual tricks used by magicians different?

3. How does the sound of a voice contrast with the use of hand movements?

4. Name one other comparison or contrast you could make using this passage.

5. On a separate sheet of paper, predict how a magician might be able to fool one of our other senses, such as the sense of touch or smell.
